# ChemGes – Version 60.0
# Update 02/2024

You can find information on the installation and a short summary of the changes in ChemGes, on the following pages.
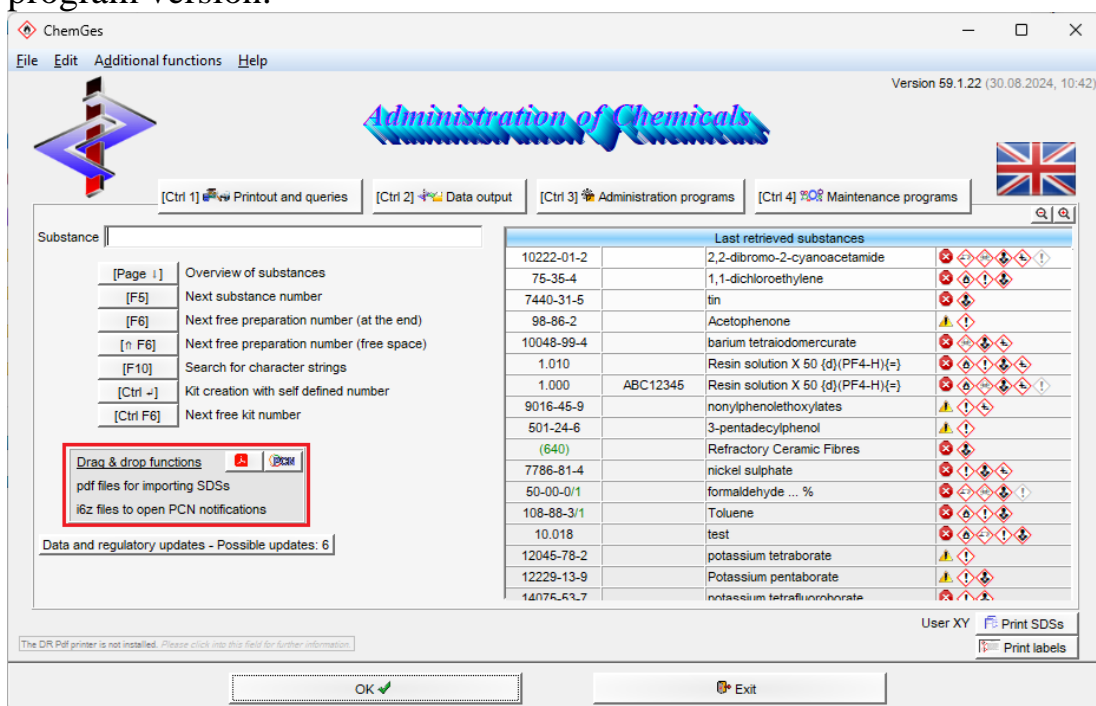

# GHS regulations

With this update, all necessary changes for the legal adjustments of the national GHS and SDS regulations for the USA, Canada, Brazil, Singapore and Serbia have been adopted.

As usual, ChemGes supports you fully automatically and implements all changes for you. In the update description you will find a short summary of the changes for each country, as well as information on the changes and new options in ChemGes.

# Import of SDSs in PDF format

With this update, we have implemented another online service that should make your work much easier:

You can now also drag and drop data from external SDSs (for example, from your supplier) in PDF format into the basic screen of ChemGes, into the main screens for raw materials and preparations, as well as directly into the screen *Formulation* by letting ChemGes extract the data from the imported SDS and transfer it into your program version.

**Find further information in the update description to Version 60.0.**

## Installation:

Please note that this Update contains extensive changes to the Database.
For this reason, the Update may take a long time.
Please, backup your program and data as normal before an Update.
Let the Update run completely and do not turn off your computer while the Update is running, as this can lead to massive data loss.

You can download the update either directly in ChemGes via the update symbol in the right upper corner of the basic screen, or via the following link:
http://dr-software.com
Please note, that your program must be at least Version 57.0 in order for your Update to be performed. Please contact our hotline if that is not the case.

To download the update, please either go to www.dr-software.com – *Downloads* – "**Update from version 57.0 or higher to version 60.0**" or click directly on the above stated link.
Save the file "32.zip" in your program directory for ChemGes (usually \chem) and unzip the file. Please make sure that the program is not in access. Afterwards you can start the update by double-clicking **chemges.exe**.

Should you need the update on USB stick, as a download is not possible for you, please also inform us by email (info@dr-software.com). We will be happy to arrange a shipment as soon as possible.

**Overview of changes:**

- Changes for the legal adjustments of the national GHS and SDS regulations for the USA, Canada, Brazil, Singapore and Serbia
- New online service for importing and extracting data from external SDSs
- Update and new adoption of occupational exposure limits, update of substance listings and national chemical inventories, update of transport names

You can find the **update description to Version 60.0** on our website at: www.dr-software.com or www.dr-software.at
